

Claims:

- Sub A1* 1. A cosmetic or dermatological preparation, which is a finely disperse system of the water-in-oil type, comprising
1. an oil phase,
 2. a water phase,
 3. at least one modified phyllosilicate, which exhibits both hydrophilic and lipophilic properties, i.e. which has amphiphilic character and positions itself at the water/oil interface,
 4. at least one flavone, flavanone and/or flavonoid and
 5. at most 0.5% by weight of one or more emulsifiers.
2. The preparation as claimed in claim 1, which is emulsifier-free.
- Sub A2* 3. The preparation as claimed in either of the preceding claims, wherein further cosmetic or pharmaceutical auxiliaries, additives and/or active ingredients are present.
4. The preparation as claimed in any of the preceding claims, wherein the content of one or more modified phyllosilicates is between 0.05% by weight and 20% by weight, advantageously between 0.1 and 5% by weight, based on the total weight of the preparations.
5. The preparation as claimed in any of the preceding claims, wherein the content of one or more flavones, flavanones and/or flavonoids is chosen from the range from 0.01 to 5.0% by weight, preferably 0.1 to 2.0% by weight, based on the total weight of the preparations.
6. The preparation as claimed in any of the preceding claims, wherein, in addition to one or more modified phyllosilicates, further pigments are present, in particular boron nitride and/or modified polysaccharides and/or microfine polymer particles and/or micronized, inorganic pigments which are chosen from the group of amphiphilic metal oxides, in particular from the group consisting of titanium dioxide, zinc oxide, iron oxides or iron mixed oxides, silicon dioxide or silicates, it being possible for the pigments to be present individually or as a mixture.

7. The preparation as claimed in any of the preceding claims, comprising one or more additives or active ingredients chosen from the group of antioxidants and/or the group of UV filter substances.
